Intermarque Car Show and Banquet Scheduled for May 2, 2004

This year's Intermarque Car Show and Banquet will be held on May 2, 2004 at the Plymouth Radisson Hotel. The show starts at Noon. The banquet will start at 3 P.M.

The banquet is a reasonable \$15.00 and you pay at the door. Email Andy Lindberg with your RSVP for car and dining count. Andy's email is andy@earthlink.net.

See page 13 of this newsletter for much more detail. If you have never attended an Intermarque gathering, please do so. Just a fun, relaxed time with other car aficionados.

Rally in the Valley has updated Registration Form

The Rally in the Valley Registration form has been updated and appears on page 7. Your editor forgot to include the complete mailing address for Diane and Steve Rindt in last months issue. If you have not yet registered, it is time to get moving and sign up for this wonderful weekend get-together.

The Gazette is the official publication of the Minnesota MG Group. It is published monthly except for December. Deadline for contributions is the 15th of the month prior to publication. Submissions should be sent to the editor.

This Is Your Last Newsletter

If you have not yet paid your dues for 2004. Dues are a cheap \$35.00. Check your mailing label and if it does not say 04, please send your check now to treasurer Dan Shidla. His address, telephone number, and email address are on page 2 and page 16. If you receive your newsletter electronically, you will get a separate email reminder.

Thank you.

The Oil on the Dipstick

By MMGG President Alan Kelsey

The Rally Part I

It has occurred to me that some of our newer members might not be familiar with all of the jargon we throw around when we get together. The word "Rally," for example, is a rather generic term, taking on a variety of meanings depending on the situation. It can mean "to gather" as in "Let's rally at the Perkins on Snelling Avenue." It can also mean a driving event. Sometimes these driving events are for fun and sometimes they are more competitive. Given the temperament of some members, any driving event that has the word "rally" in the description is most definitely competitive. I'll write more about this later.

When the word is used to describe a driving event, it is usually preceded by an adjective that some believe actually clarifies what should be happening along the way. I don't always find this to be true. For example, I can understand that a Road Rally takes place on a road. However, when involved in a Sport Rally are we to play a sport along the way, such as polo? I've never seen them pass out those mallets with the really long handles at any event I've attended. Then there's a Poker Rally. This is where drivers pick up a playing card at every stop and, at the end, the best hand wins. One that really threw me for a while was a Tulip Rally. I thought the organizers had slipped a ring or two because it was held in July and all the tulips in my yard had finished blooming months before. I've included a few of these "visual instructions" at the end of the article. When you go on one of these, you will hear how easy it is to know where and which way to turn just from these little pictures. **Don't believe it!** Let me tell you, when you're doing about 60 mph along a country road because the MG behind you is trying to make up time by crawling into your boot and the navigator has just said, "STOP! STOP! We have to go back! I saw the cutest little

(The Oil on the Dipstick Continued on page 3)

(The Oil on the Dipstick Continued from page 2)

thing back there” and you’re coming up with all kinds of meanings for “little thing,” none of which can be put in this article, understanding that you were supposed to bear right at the cow path three miles back is just not one of the options.

A Rally is actually the oldest form of automotive competition. Before there was a Sebring, Daytona, or Indy, there were races held on public roads around the world. The first recorded auto race was in 1878, from Green Bay to Madison, Wisconsin: J. Carhart and A.M. Farrand won in an Oshkosh steam car averaging 6 mph. The first organized motor sport event was the Paris to Rouen Trial in 1894. In 1895, the first major automobile race was held from Chicago to Evanston, Illinois. It was 50 miles from start to finish and took 9 hours to run. Also in 1895, the first organized road race to be sanctioned by the Automobile Club de France was held from Paris to Bordeaux to Paris.

Rallies grew from these open road races. In fact, the Instructions for the First Vanderbilt Cup Race could be used in a Stage Rally today with only minor modifications. Factories entered cars to prove their worth to the public. The marathon events like London to Sydney or Paris to Dakar came to be (and still are) the major proving grounds for many manufacturers. The concept of open road racing grew and flourished in Europe, Africa, and Asia during the time between the great wars.

Then there are a few movies made about such things like, “The Great Race” (Tony Curtis, Natalie Wood) and “Those Daring Young Men in Their Jaunty Jalopies” (Tony Curtis, Terry-Thomas, Dudley Moore).

The key to enjoying a rally is taking it at *your* speed. If you want to take your time, go ahead. Sharon and I do that once in a while and it’s fun to watch (and listen) as other cars go whizzing by. A slightly longer rally for our club will be held in a couple of months. Steve and Diane Rindt have organized “The Rally in the Valley” which should prove to have a very high “smile to mile” ratio.

Whether you plan to rally or not, don’t forget about the upcoming tech sessions and opportunities to just get together and renew those acquaintances. Stay tuned to next month’s installment on “The Rally.”

Until Next Time,

Alan Kelsey

Tulip & Explanation	
	Left onto Divided Highway at Traffic Light.
	Right on exit ramp after sign. The information column in the instructions will have whatever the sign has written on it to enclosed in quotes.
	Bear Right at Y after Dry Wash. The information tells us this is a dry wash. A water crossing would have more water lines across the road and would most likely bear one ! or two !!
	Bridge. Probably a wooden bridge. Definitely a narrow one. Possible one ! in the information column.
	! Exposure on left. Exclamation Mark Located in the Information column of the Instruction sheet. One ! means “Be aware of this.” Two !! means “Probable damage to the car if you attempt to execute this instruction at rally speed.” Three !!! means “DANGER to life and limb. SLOW down.” Three !!! is reserved for truly dangerous situations.
	Railroad crossing. TSD shorthand would be ‘RXR’.

Tulip & Explanation	
	<p>Left onto unpaved through gate. This little Tulip holds a wealth of information. The gate:  The fence:  and the Unpaved Road:  and the footpath which looks a lot like the dirt road only a bit smaller dashes. If you look closely you'll see that a dirt road intersects the paved road you are on from an acute right just before you get to the left through the gate. The paved road that leaves the intersection to the right has a fence on both sides of it. The road you are on continues, apparently through a fence, but more likely through a gate.</p>
	<p>Right onto paved and immediately bear left onto unpaved. This is the same intersection as the previous tulip.</p>
	<p>Left onto paved road after Culvert.</p>
	<p>Continue through gate. The Gate is probably in a barbed wire or chain link fence.</p>
	<p>Tree at exit of curve.</p>

Summary of Activities

Submitted by MMGG Member Jon Masley

So far this season MG related activities have been good. The Kick-Off Brunch March 27th was wonderful. Dawn Williams got us into a new(er) restaurant named *Etre'* where about 40 club members proceeded to have a super meal and great socializ-

ing. Although Vice President Elena Pierce considered piano playing, most of the talk was about upcoming road trips. June's road trip to Winnipeg is something I am looking forward to, as well as the August road trip to Grand Rapids, Michigan and John Twist's Summer Party. Thanks Dawn for hosting the Kick-Off event!

For those of you that had cars stored at Dick Wallrich's Bus garage, April 10th was the day you

Have You Paid Your Dues?

moved your vehicle. I notice oil changes being done along with other basic maintenance item, to be ready for the driving season.

Over 40 people attended the April 17, 2004 Tech Session held at Dan Iberg's shop, *Midwest Motor Sports* in Sauk Rapids, Minnesota. A number of members from the Jaguar club attended as well. Much work got done. President Al Kelsey, along with Sharon Kelsey, watched as cruise control was

added to their car. Wendi Sott gave her car a through going over to be ready for the driving season. A new badge bar was installed on Dawn Williams's car along with a license plate bracket and the bumper was adjusted. Things that took time. Ann Klein installed new trim rings on her Rostyle wheels and ignored my attempts to talk her into the nice Mini-Lites Terry Nydeen had for sale. Tim

Frakes had stone guards installed on his very nice MGA but that job took forever! Ann Klein won the door price and will now be carrying a nice wrench set in her car, if anyone ever needs a wrench on the road. Larry and Barb Henle had a new brake light switch installed and got home safely as a result.

Around the lunch hour we all feasted on pizza. To top it off, Barb and Larry Henle furnished cake. And not any ordinary cake. Cake we ate in celebration of their 50th wedding anniversary. Fifty great years with much of it together in their MG's. A very hearty

CONGRATULATIONS

to the young thinking couple. We wish them all the very, very best.

Tech Tip: Horse Power

*Submitted by Ernie & Rhea West
Proprietors of Dead Lake Motors*

There's a Country and Western song lyric saying: There's no such thing as too much money, a girl too pretty, a car too fast, or having too much fun. Well, being this is a car club newsletter, I suppose we'd better just address the third one. Engine power is what we're talking about. First, let me ask you, do you know how much power you need to make your car 20 percent faster? A more or less agreed on number is 100 percent more. So you see, adding 5 or 10 horses is not going to get you the pole position at the local circle track.

My father-in-law, whom I pretty much disagreed with all the time till he died, always said: "Paper will lay still for anything". Meaning of course that print isn't necessarily always true. A case in point is some of the mail catalog advertisements. If all of the "up to 15 percent increase in power" ads were true, you could build a 200 MPH Nash Rambler just by bolting on two or three \$9.95 gismos.

In reality, horsepower increases generally come quite dearly. First off, the basic design has to lend itself toward horsepower gains. Example, a Packard flat head straight eight doesn't have near the possibilities that a small block Chevy does. Occasionally there are exceptions that defy this rule though. But, let's just pick one engine. Let's say your engine. Even the worst of engines have some possibilities, so here we go. First, you have to establish some perimeters. Are you building it to just go a quarter of a mile at a time (maybe even just one time) or do you hope to get over a hundred thousand miles between tear downs? What fuel do you plan on using? Where do you want the power band to be? What amount of money are you limited to?

Then there's the intelligence factor. No amount of money or wishing will cover up a bad decision. An 8000-RPM cam won't work on your Buick straight eight. Nor will an 850 Holly do wonders on your Honda Civic.

Here is a list of things that can help you gain power: compression, cam timing and lift, carburetion, exhaust system, balancing, reciprocating weight reduction, blue printing, special tough metal parts, supercharging, turbo charging, and nitrous oxide.

On most normal everyday type engines, your probable best and quickest way to gain 50 percent is to just super or turbo charge your stock engine. But this dictates that you have a pretty sound engine and that it doesn't have too high of a compression ratio.

If your engine is already at the max, you could spend thousands more just to get 10 more ponies. But if it's the more generic model you can make great gains with only a few hundred dollars mixed in with some careful hours of manual labor. If your engine is on its last leg, that's the best time to grab these extra horses cause you're going to have it torn down any way. When I build an engine and the customer (or myself) wants quick easy horsepower gains at the same time, the first thing I do is incorporate the first five things listed above. None of these five all by themselves gives you much of a return. But all five put together make a big difference. The remaining items are quite expensive.

That's enough for now. I'll give you my ideas about incorporating these five basic things in the next couple of newsletters. Doctor Ernie

Tech Tips are provided by Ernie and Rhea West, proprietors of Dead Lake Motors. Dead Lake Motors is located 13 miles southwest of Perham, Minnesota. May Tech Tip from Intermarque Editor Andy Lindberg.

Women, are you having trouble getting your auto-motively entranced spouse to help clean up around the house? Next time, try this. Instead of asking him to vacuum, inform him that you have a power tool that needs a test drive. Reports indicate that this method improves results by at least 37.9 %

New(er) Members -Need a Nametag?

If you are a new(er) member and have not received your nametag(s), or are an existing member and lost yours, please request one from new member coordinator Brian Walsh (651-731-6921). If you leave a message, please be sure to **SPELL** both first and last names for each name tag and leave a phone number at which you can be reached. Lost nametags cost \$5.00. Send your check to Brian, made out to MMGG.

Who? The owners of any of the vintage cars shown around the border. And owners of other vintage European cars as well. And not just the owners but the cars too. Don't forget the cars!

What? Three things: An informal celebration of the melting of the permafrost; an informal car show with exceptional trophies; and an informal banquet with great awards, a little hilarity, and no boring guest speaker.

Where? The Plymouth Radisson. This is the same site as last year's event, but this year we have been promised parking on the grass (for early arrivals at least). Either use the map below, install GPS in your TC, or leave a half-hour early.

When? Sunday, May 2, 2004. Noon to three for the car show. Three to five for the banquet. All day to enjoy the warm weather, sunshine, and beautiful cars.

Why? Because it's spring, the 20W50 is running, and that means it's car time.

How? Well, drive your car, of course. If it doesn't run or you don't own one, come on over anyhow.

How much? Car show is free. Banquet is \$15.00 (cheap). Pay when you enter.

Please RSVP. We need to give the hotel the number of cars and diners to expect. Send your driver and co-driver names, car make, model & year, plus your local or national club membership to andylinberg@earthlink.net.

Fuel Pump Overhaul

When was the last time you checked your fuel pump? Now that winter is over, why not have your fuel pump overhauled?

All SU pumps overhauled using ALL NEW factory original parts specially imported from England. If it moves, we replace it. All models undertaken including LP (for TD, TC, and earlier), HP (for MGA and TF), AUF300 (for MGB), and LCS (for Austin Healey and MGA Twin Cam). Others inquire.

Most are a flat fee of \$40.00 plus parts (usually \$40.00). Typical turnaround is 3 days.

Horns and wipers also overhauled. MG mechanical service and restoration also available.

Special Request Can You Drive an MGA to Winnipeg?

Submitted by MMGG Member Joe Olson

I am going to have surgery in early May, soon after the Intermarque Show and Banquet. I am still planning to go to the River City Rendezvous in Winnipeg in early June.

However, I will still be in recovery and probably not able to drive a clutch-operated vehicle more than a few miles.

So, I'm looking for someone who wants to go to Winnipeg and is willing to drive my MGA and me up there and back. Interested? Please give me a call at 651-604-0205 or jolson@gw.hamline.edu.
